

Banten Masa Depan

The Bamboo Revolution & Sustainable Cities

A Vision for a Regenerative Economy, from the Roots to the Sky.

Ar. Mukoddas Syuhada & The National Research
Collaboration Center for Biomass (PKR-B3I).

The Architect of Ecosystems

Ar. Mukoddas Syuhada, S.T., M.T., IAI.

Current Roles:

- Asisten Daerah (ASDA) 3, Government of South Tangerang City
- Chairman of PERPUBI (Perkumpulan Pelaku Usaha Bambu Indonesia)

A career spanning 15+ years bridging government policy, architectural innovation, and environmental activism. From designing government centers for the Provincial Govt of Banten (60 Ha) to establishing digital bamboo cooperatives and the Tapak Bumi Village.

Education:

Architect (ITB, 2001), Urban Planner (Master's in Civil Engineering, UPH).

Awards: Ganesa Widya Jasa Adiutama (ITB, 2016).

Activism: Initiator of the 'Bamboo Revolution' (2008).

Mandated by Science: *The National Collaboration*

Pusat Kolaborasi Riset Biomassa dan Bioproduk Bambu Indonesia (PKR-B3I) 2025

Mission: To execute advanced research and collaboration on biomass and bamboo bioproducts, funded by the Indonesian Research and Innovation Agency (2025).
Inter Regular

The Core Philosophy: *Revolusi Sebatang Bambu*

Shifting from Extraction to Regeneration.

Papan (Shelter)

Sustainable housing, strand woven bamboo, and construction laminates.
Inter Medium/Regular

Pangan (Food)

Food security through bamboo shoots and intercropping.
Inter Medium/Regular

Energi (Energy)

Renewable biomass energy sources.
Inter Medium/Regular

“Membangun ekosistem bambu dari tingkat hunian, desa, hingga provinsi.”

A Holistic Industrial Loop

Micro-Integration: Tiap Rumah, ada Rumpun Bambu dan Kios Bambu.

Innovation: The World's First Digital Bamboo Planting

Transparent

Investors can track specific planting coordinates.

Secure

Digital ownership via Blockchain Smart Contracts & NFTs.

Inclusive

Public participation via mobile.

“Bersama *Blockchain*, kami tak hanya menanam bambu, tetapi juga menumbuhkan kepercayaan.”

Track Record & Environmental Impact

Inter Medium
Banten (Tangerang, Serang, Pandeglang),
West Java, Sumatra, Aceh.

Case Study

Tapak Bumi Village (Est. 2008)

4-hectare eco-village in
Karangantu featuring a 200-
meter mangrove green belt.

Recent Milestone

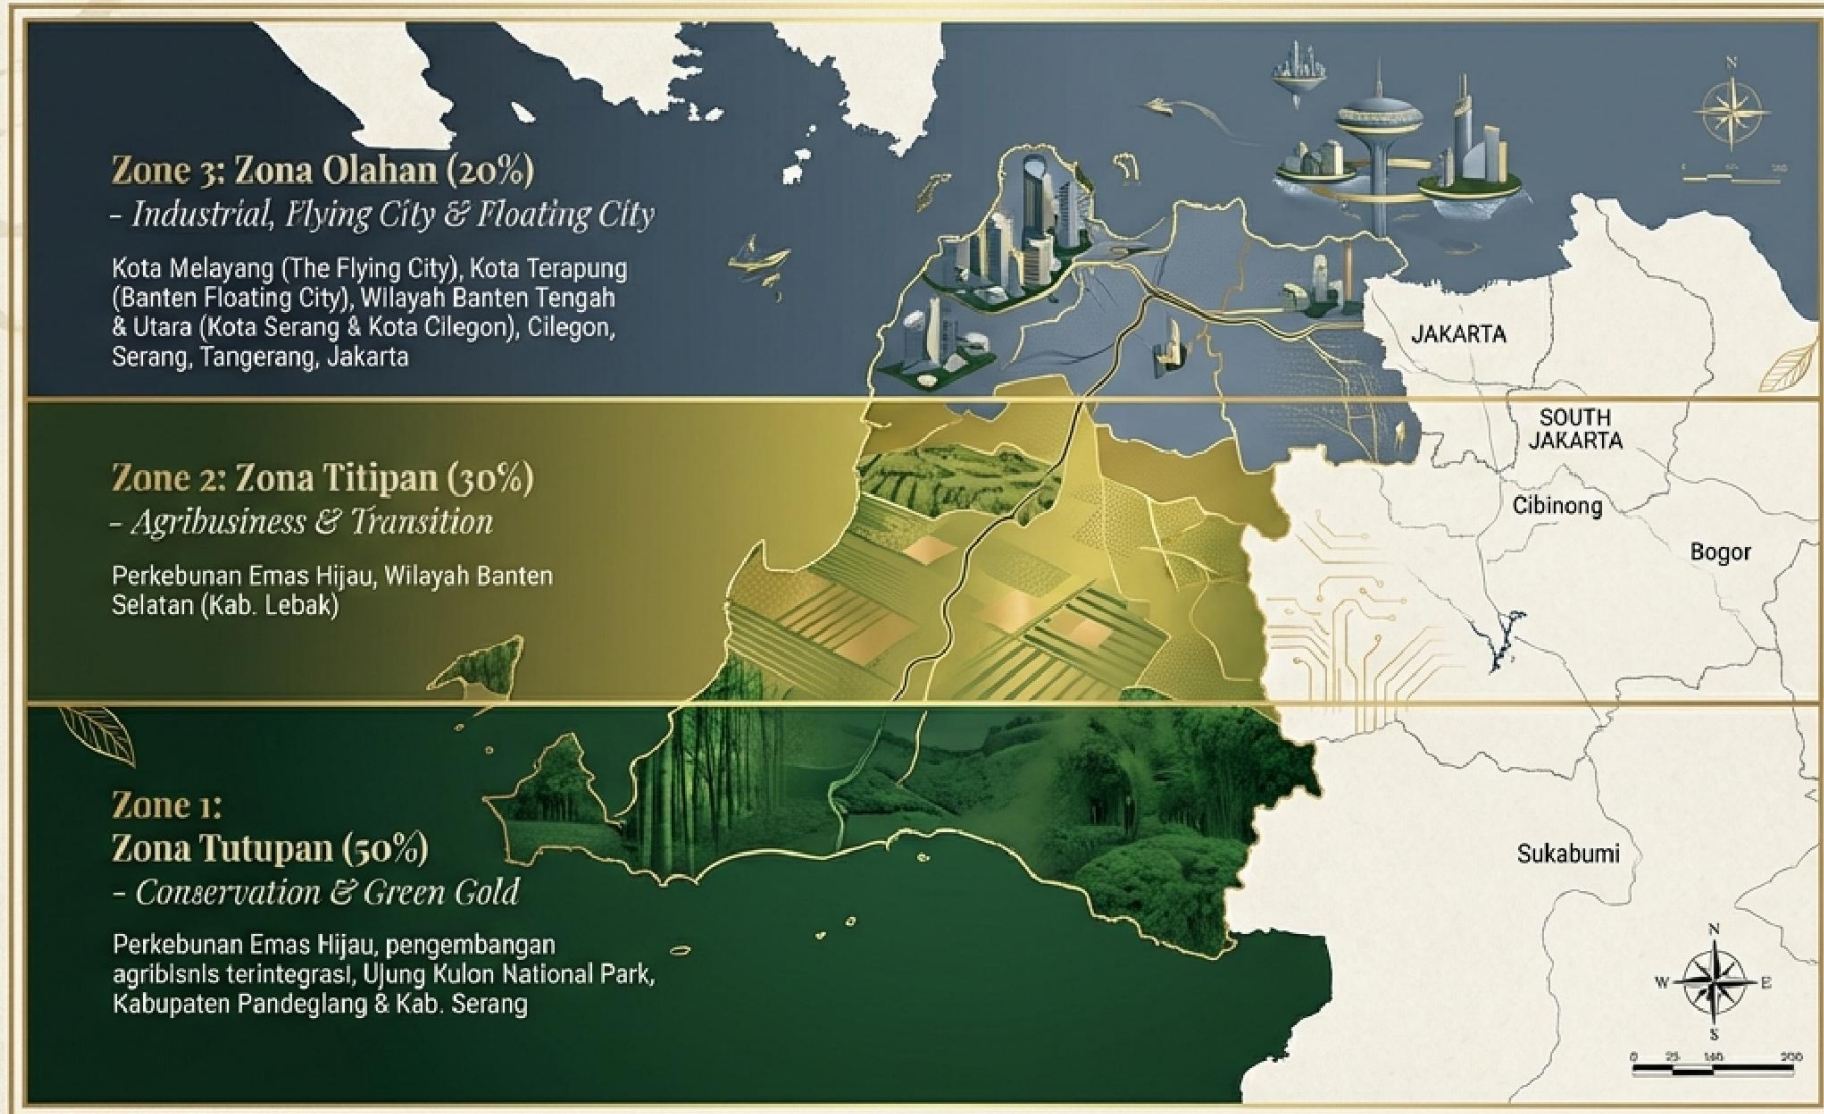

2024: 1,150 seeds in Kota
Tangsel & **1,100 seeds** in
Kasepuhan Cibarani via **Web3**

Impact Metric

50 Tons CO₂
absorbed annually

Banten Masa Depan: The Spatial Strategy

The Green Foundation: *Zones Tutupan & Titipan*

South Banten: Perkebunan Emas Hijau (Green Gold).

Focus on high-value commodities: Bamboo, Stevia, Coffee, Spices. Driven by community cooperatives and organic farming.

Central Banten: Integrated Agribusiness Clusters.

Smart farming, irrigation tech, and post-harvest processing connecting the agrarian south to the urban north.

The Future of Living: Banten Flying & Floating City

Location

Zone Olahan (North Banten / Teluk Banten)

Scale

3,000 Hectares

Concept

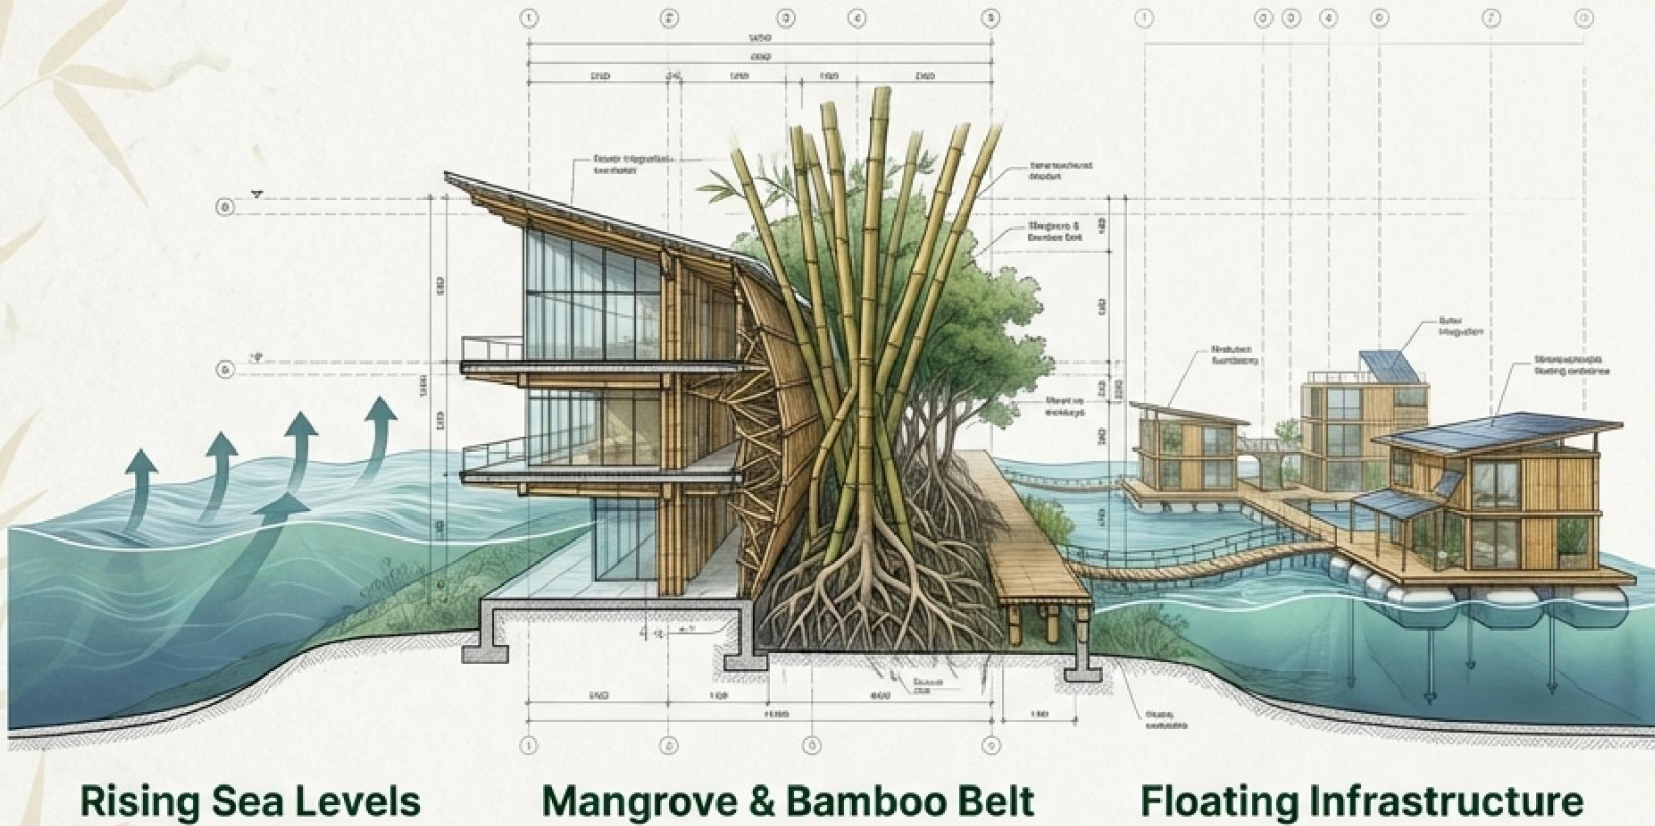

Reviving the maritime glory of the Banten Sultanate through buoyant, adaptive waterfront infrastructure.

Key Features

Vertical living to reduce land use, eco-transport, and climate-resilient floating trade hubs.

Adapting to a Changing Climate

- Coastal defense via the Tapak Bumi model.
- Living **with** water, not fighting it.
- Bio-Based Materials: Utilizing bamboo for thermal performance and sustainable construction.

A model where advanced architecture meets ancestral wisdom.

Cisadane: Model Masa Masa Depan Indonesia Asri

Sebuah solusi terintegrasi yang menyatukan konservasi sungai, ruang publik sehat, dan industri hijau yang mensejahterakan.

1. Persetujuan 'Go-Decision'
2. Kolaborasi Lintas Sektor untuk Pilot Project

Bersama Mewujudkan Visi Indonesia Emas.

Join the Collaboration

We invite investors, government partners, and researchers to build the "Green Gold" economy and the cities of tomorrow.
