Profil Yayasan Sabumi Nusantara Jaya

Yayasan Sabumi Nusantara Jaya adalah lembaga nirlaba yang berdedikasi untuk mempromosikan dan mendukung pembangunan ekonomi hijau demi kejayaan Nusantara. Didirikan oleh Mukoddas Syuhada pada tanggal 18 Agustus 2023 sesuai dengan Akta Nomor 18 oleh Notaris Arjamalis R. SH. SpN. MH., di Kota Serang, Banten.

Visi:
"Menyelamatkan Peradaban dengan Desain dan Teknologi."

Misi:
Menciptakan lingkungan dan masyarakat yang berkelanjutan, di mana ekonomi yang berbasis pada prinsip-prinsip hijau dapat tumbuh dan berkembang secara berkelanjutan di seluruh wilayah Nusantara.

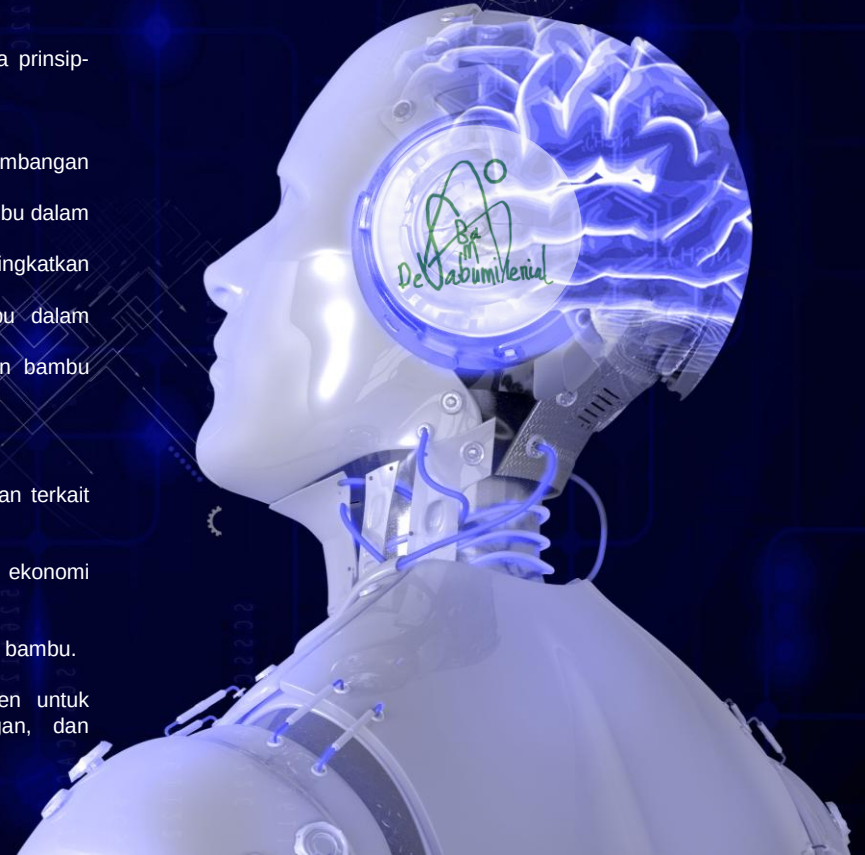

Produk dan Layanan

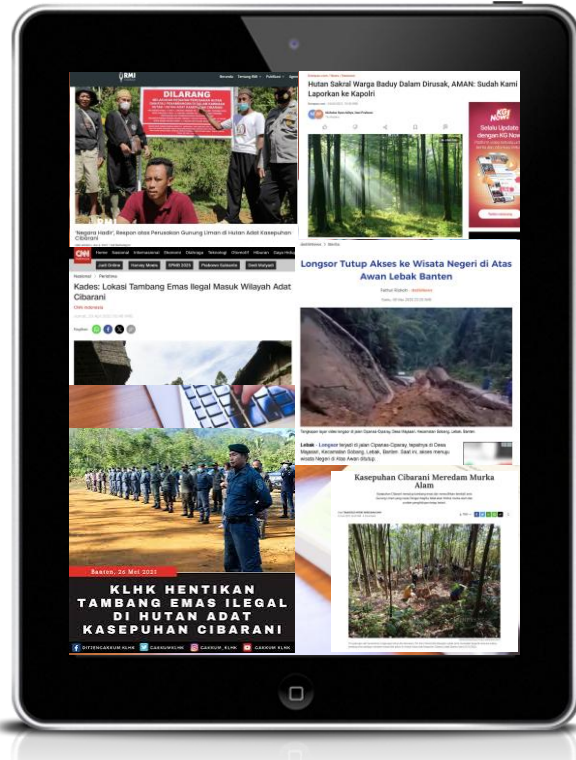

1. **Akademi Bambu Nusantara:** Fasilitas pendidikan dan pelatihan yang berfokus pada pengembangan keterampilan dan pengetahuan terkait bambu.
2. **Desa Bambu Milenial:** Inisiatif untuk menciptakan komunitas yang mengintegrasikan budaya bambu dalam kehidupan sehari-hari, mendukung ekonomi lokal dan keberlanjutan lingkungan.
3. **Workshop Bambu:** Program pelatihan praktis untuk pembuatan produk berbasis bambu, meningkatkan keterampilan dan peluang ekonomi masyarakat.
4. **Kios Bambu:** Pusat penjualan produk-produk bambu, mempromosikan penggunaan bambu dalam kehidupan sehari-hari.
5. **Ekosistem Bambu:** Pengembangan lingkungan yang mendukung budidaya dan pemanfaatan bambu secara berkelanjutan.

Layanan Utama:

1. **Workshop:** Pelatihan praktis dalam pembuatan dan pengolahan produk bambu.
2. **Pendidikan dan Pelatihan:** Program edukasi untuk meningkatkan pemahaman dan keterampilan terkait bambu dan ekonomi hijau.
3. **Penelitian:** Kegiatan riset untuk inovasi dan pengembangan teknologi terkait bambu.
4. **Pemberdayaan:** Inisiatif untuk meningkatkan kapasitas dan kesejahteraan masyarakat melalui ekonomi bambu.
5. **Restorasi dan Revitalisasi:** Upaya pemulihan lingkungan dan budaya melalui bambu.
6. **Relawan dan Advokasi:** Keterlibatan masyarakat dalam mendukung dan mempromosikan inisiatif bambu.

Melalui berbagai program dan layanan tersebut, Yayasan Sabumi Nusantara Jaya berkomitmen untuk mendorong pembangunan ekonomi hijau yang berkelanjutan, menjaga kelestarian lingkungan, dan meningkatkan kesejahteraan masyarakat di seluruh Nusantara.

Bamboo Furniture Market Size, Share & Trends Analysis Report By Type (Chair & Tables, Stools, Beds), By End Use (Residential, Commercial), By Region (Europe, APAC, MEA), And Segment Forecasts, 2024 - 2030

The global bamboo furniture market size was valued at USD 11.5 billion in 2023 and is projected to grow at a CAGR of 6.9% from 2024 to 2030. This growth is attributed to a combination of environmental awareness, versatility, and the durable nature of bamboo and its use across various businesses. In addition, the growing demand for durable and aesthetically pleasing furniture that can withstand daily use is fueling the adoption of bamboo, which is known for its inherent strength and natural beauty.

Indonesia Bamboos Market Size, Share & Trends Analysis Report By Product, By Application (Construction, Furniture, Textile, Food, Energy, Pulp & Paper), And Segment Forecasts, 2021 - 2028

The Indonesia bamboos market size was estimated at USD 1.7 billion in 2020 and is expected to expand at a compounded annual growth rate (CAGR) of 6.2% from 2021 to 2028. Rising demand for the product in several industries including construction, pulp & paper, furniture, and food is expected to drive the market over the forecast period. An increase in product usage in the construction industry for making walls, flooring, roofs, scaffoldings, doors, and windows due to high sustainability, less weight, high compressive strength, and natural appeal is expected to have a positive impact on the market growth.

December 23, 2021

Bamboo Toothbrush Market Size, Share & Trends Analysis Report By Distribution Channel (Offline, Online), By End-use (Adults, Children), By Region (North America, Europe, APAC, Latin America, MEA), And Segment Forecasts, 2025 - 2030

The global bamboo toothbrush market size was valued at USD 36.6 million in 2024 and is expected to grow at a CAGR of 9.9% from 2025 to 2030. This growing consumer awareness of environmental sustainability with a global initiative to reduce plastic waste, including single-use plastics, drives demand for bamboo toothbrushes. Moreover, some research studies have predicted that plastic toothbrushes contain toxin chemicals such as BPA, which disrupt the human body's hormones and cause brain and behavioral disorders.

Part two

Market Opportunity

Pasar Global Ekonomi Hijau Rp 1.500 Triliun pada 2030

1. Permintaan bambu global tumbuh 8% per tahun (Grand View Research, 2023).
2. Indonesia memiliki 2,2 juta hektar lahan terdegradasi potensial untuk agroforestri bambu.
3. Carbon credit market cap: \$2 miliar (2025), bambu sebagai aset penyerap karbon.

Impact Model Tripple Bottom Line: People, Planet, Profit.

1. Planet

Rehabilitasi 500.000 ha lahan kritis pada 2030. Penyerapan 10 juta ton CO₂/tahun.

2. People

Pemberdayaan 50.000 petani di 100 desa adat. Peningkatan pendapatan petani 300% melalui rantai pasok berkeadilan.

3. Profit

Potensi pendapatan dari penjualan produk bambu (Rp 200 miliar/tahun). Penjualan carbon credit (Rp 50 miliar/tahun).

B. Pengembangan dan Pemberdayaan

III. Pemeliharaan, Monitoring Lanjutan, dan Pengembangan Hak Kekayaan Intelektual (HKI) 13-36 Bulan.

1. Monitoring Bibit Bambu (12 dan 24 bulan sejak bibit bambu ditanam);
2. Pengembangan Teknologi dan HKI; dan
3. Pemberdayaan Masyarakat dan Memperkuat Ekosistem Bambu.

A. Implementasi Teknis dan Kepatuhan Hutan Adat

I. Persiapan dan Fondasi Proyek (1-3 Bulan)

1. Pengakuan dan Penetapan Hutan Adat;
2. Surat Perjanjian Kerjasama (SPK) dengan Kasepuhan Cibarani dan Kepatuhan Regulasi Lokal; dan
3. Pembentukan Tim dan Rencana Kerja.

IV. Panen Perdana dan Monetisasi (37-48 Bulan)

1. Pemantauan 36 Bulan dan Persiapan Panen;
2. Panen Perdana; dan
3. Ekspansi dan Replikasi.

C. Panen Perdana, Komersialisasi, dan Ekspansi

1. Survei dan Pemetaan Drone-IoT (490 ha);
 2. Peluncuran NFT Bamboo 4.0 dan Pendanaan;
 3. Penanaman Bibit dan Kepatuhan Adat; dan
 4. Pemantauan Bibit Bambu (3 dan 6 bulan sejak bibit bambu ditanam).
- II. Survei, Pemetaan, dan Penanaman Bibit Bambu (4-12 Bulan)

1. Proyek memiliki dasar hukum yang kuat atas lahan seluas ± 490 ha sebagai hutan adat;
2. Tersusunnya peta awal kepemilikan dan tata batas lahan adat;
3. Proyek resmi mendapat persetujuan masyarakat adat sebagai pemilik lahan;
4. Seluruh izin tambahan dan regulasi lokal telah dipenuhi;
5. Tim proyek terbentuk, rencana kerja dan anggaran disetujui; dan
6. Platform web3.bambu.co.id (versi beta) siap untuk tahap pilot project.

A. Implementasi Teknis dan Kepatuhan Hutan Adat

1. Tersedianya peta digital terintegrasi di big data;
2. Konfirmasi kecocokan lahan (agroklimat);
3. Dana operasional terkumpul (untuk bibit, peralatan, asuransi, dan lain sebagainya);
4. Distribusi hasil penjualan NFT ke petani, penjual bibit, asuransi, yayasan, manajemen, founding father, influencer, dan lain sebagainya;
5. Bibit tertanam dengan tag ID unik yang terhubung ke NFT (data real-time);
6. Masyarakat adat terlibat aktif, menegaskan pemberdayaan lokal;
7. Laporan 3 dan 6 bulan (survival rate, pertumbuhan) di big data; dan
8. Transparansi rantai pasok (penanaman $\rightarrow$ pemantauan) mulai terbentuk.

I. Persiapan dan Fondasi Proyek (1-3 Bulan)

II. Survei, Pemetaan, dan Penanaman Bibit Bambu (4-12 Bulan)

B. Pengembangan dan Pemberdayaan

III. Pemeliharaan, Monitoring Lanjutan, dan Pengembangan Hak Kekayaan Intelektual (HKI) 13-36 Bulan.

1. Laporan 1 dan 2 tahun meliputi dampak lingkungan (restorasi lahan, keanekaragaman hayati), data pertumbuhan;
2. Semakin banyak petani milenial terlibat karena bukti insentif NFT;
3. Proyek memiliki perlindungan HKI lengkap (hak cipta, merk dagang, indikasi geografis);
4. Uji coba token BaMbuCrypto untuk insentif ekosistem bambu;
5. Tumbuhnya hunian yang menjadi petani milenial, pengusaha digital, memiliki kios produk bambu; dan
6. Kelurahan/Desa mulai mengadopsi kebun bambu, Kabupaten/Kota menyiapkan Desa Bambu Milenial dan Akademi Bambu Nusantara.

IV. Panen Perdana dan Monetisasi (37-48 Bulan)

1. Laporan 3 tahun, persiapan panen di tahun ke-4;
2. Potensi penjualan carbon credits (US\$5–US\$15/ton CO₂e) bila memenuhi sertifikasi;
3. Terwujudnya “Transparansi Rantai Pasok” dan keunggulan hulu ke hilir;
4. Petani, investor, dan masyarakat adat menerima manfaat finansial nyata;
5. Model siap direplikasi di wilayah lain, “Industri Bambu Terintegrasi” di level provinsi; dan
6. Peningkatan skala proyek dan keberlanjutan finansial tercapai.

C. Panen Perdana, Komersialisasi, dan Ekspansi

Jarak total: 10,40 km (6,46 mil)

Kawasan Gunung Liman di Kasepuhan Cibarani, Lebak Banten, merupakan salah satu ekosistem hutan primer yang masih terjaga di Jawa yang berperan sebagai "Payungnya Jawa", terutama bagi Banten. Hutan ini menjadi sumber kehidupan bagi masyarakat adat Kasepuhan Cibarani dan Suku Baduy, menyimpan 17 mata air yang lima di antaranya menjadi hulu sungai besar penyokong kehidupan jutaan warga Banten. Namun, ekosistem kritis ini kini menghadapi ancaman serius akibat eksploitasi manusia, seperti penebangan liar dan penambangan emas ilegal yang merusak struktur tanah, mengganggu siklus air, dan mengancam keanekaragaman hayati.

Masyarakat adat yang hidup harmonis dengan alam pun akan terpapar dampaknya, seperti degradasi hutan mengurangi pasokan air bersih, merusak lahan pertanian tradisional, dan mengikis kearifan lokal dalam pengelolaan sumber daya alam. Di sisi lain, tekanan ekonomi sering memaksa warga mencari alternatif penghidupan, termasuk menebang kayu atau terlibat dalam aktivitas ilegal. Jika tidak diintervensi, rusaknya, bahkan hilangnya hutan primer ini bukan hanya akan memicu krisis ekologi, tetapi juga mengancam identitas budaya masyarakat adat yang bergantung pada kelestarian alam.

Kasepuhan Cibarani

"Leuweung Hejo, Rakyat Ngejo"

CLICK TO ADD CAPTION TEXT

Masyarakat Kasepuhan Banten Kidul dan Baduy memiliki tradisi kuat dalam pengelolaan hutan berbasis kearifan lokal (hutan tutupan, titipan). Proyek ini memperkuat nilai-nilai tersebut dengan pendekatan modern.

Kearifan Lokal Pilot Project Strategis

Kesuksesan di sini dapat direplikasi di kawasan hutan primer lainnya di Indonesia yang menghadapi ancaman serupa.

Menjaga, merawat, restorasi dan rehabilitasi hutan Gunung Liman akan melindungi 17 mata air yang menjadi tulang punggung ketahanan air Banten dan Jakarta.

Mitigasi Krisis Air

Usaha menjaga keberlanjutan lingkungan dan alam dengan menyediakan lahan seluas 490 ha untuk ditanami bambu yang merupakan bagian dari program agriculture.

Komitmen Keberlanjutan

Dulhani, born in Lebak, Banten on July 11, 1971, is a highly respected head of Kasepuhan Banten Kidul known for his unwavering commitment to protecting customary land and Gunung Liman. In 2019, he dismantled illegal gold mining operations that endangered Wewengkon Kanekes and Banten Kidul. Through local gatherings (riungan adat), he fosters collaboration among indigenous communities, NGOs, and government bodies to safeguard these forests. Numerous reports document his efforts to report deforestation to authorities and advocate for stronger law enforcement. His leadership emphasizes the fusion of tradition and environmental stewardship, preparing younger generations to uphold local wisdom and prevent further ecological harm. Widely regarded for his decisive actions and dedication, Abah Dulhani continues to inspire community-driven conservation efforts across Banten. By uniting cultural values with practical measures, he reinforces the crucial role of indigenous leadership in maintaining ecological balance and preserving Banten's heritage.

Firdaus Ghozali, born in Serang on November 10, 1972, is an entrepreneur with an economics background who earned his bachelor's degree from Universitas Pasundan (2000). Throughout his university years, he was active in organizations such as Himpunan Mahasiswa Manajemen Unpas and Himpunan Mahasiswa Islam, later joining various social and political bodies including Yayasan Nurul Islam, Perguruan Pencak Silat Haji Salam, Banten Silat Club, and Banten Creative Community. He also served as Deputy Secretary and Deputy Executive Director at DPD Partai Demokrat Banten, then joined DPW ISNU Banten. His professional career spanned roles at the Ministry of National Education, Mitra Kesehatan Jaya, and PT Nikomas, culminating in his election as a Serang City Parliament member (2014–2019). Since 2023, Firdaus has chaired Yayasan Sabumi Nusantara Jaya, focusing on environmental protection, community empowerment, and local economic development, while also farming stevia as a high-value natural sweetener.

Wawan Wahyuddin, (b. Kuningan, Jan 1, 1962) is the Rector of UIN Sultan Maulana Hasanuddin Banten, holding the civil service rank of Pembina Utama (IV/d). A graduate of IAlB Serang (B.A., 1990), UHAMKA (M.A., 2000), and UIN Syarif Hidayatullah Jakarta (Ph.D., 2011), he has taught since 1985 and rose to professor in Islamic Education. His teaching at the Postgraduate Program centers on Organizational Behavior and Islamic Education Policy. Over three decades, Prof. Wawan has held numerous administrative roles at UIN SMH Banten and is a frequent keynote speaker at forums hosted by Bank BSI, BPIP, the Regional Inspectorate of Banten, and MUI Banten Province. He also participates in several organizations, including DKM Masjid Agung Ats-Tsauroh and PWNU. Recognized with the Satya Lencana Karya Satya XXX Years Medal (2018), Prof. Wawan strives to enhance research and international collaborations, ensuring that UIN SMH Banten's curriculum meets contemporary needs. He envisions a dynamic Islamic higher education ecosystem, blending academic rigor with societal relevance.

Mukoddas Syuhada, born in Serang on 28 October 1976, graduated in Architecture from ITB (2001) and co-founded IAI Banten. In 2007, he obtained a Madya Architect certificate and built Tapak Bumi Village in Karangantu. After earning an MT from UPH in 2010, he formed Banten Creative Community (BCC) in 2011. He hosted a Bamboo Workshop in Tangsel (2012) to unite bamboo activists and has since championed a Bamboo Revolution for multi-sector sustainability. He chaired IAI Banten (2015–2019), promoted bamboo ecosystems (2019), and launched ABN Online plus a Digital Bamboo Cooperative (2020). He received awards including Ganesa Widya Jasa Aditama (ITB, 2016). From 2004 to 2013, he contributed to developing Banten's 60-ha government center, then led Tangsel's 3-ha government center project (2013–2016). In 2023, he founded Yayasan Sabumi Nusantara Jaya, and in 2024 became Chairman of PERPUBI and ASDA 3 Tangsel. In 2025, he co-founded Dewan Adat Nusantara. One of his key visions is dividing Banten into three zones: a "green gold" bamboo estate in the south, a "Flying City" in the center, and the 3000-ha Banten Floating City in the north, aiming to restore the region's past glory.

Jonathan F

Head of Marketing & Communication Division

Jonathan F. is the owner of the Limited Liability Company Inakaz Citraniaga Internasional which operates in the Information and Technology sector. There are two main areas in which this is done. The first is building an internet network starting from Base Transceiver Station (BTS) towers to fiber optic internet networks. Second in the field of data and privacy security technology, namely Passwordless Blockchain Secure Authentication (BSA), which is also the first blockchain-based technology in Indonesia for securing data privacy.

Stef Kuntarto

Head of ICT Div.

Stef Kuntarto is a visionary entrepreneur and CEO of Tokenin Digital Indonesia, an innovative blockchain technology company operating in Singapore and Indonesia. Under his leadership, Tokenin has pioneered the use of smart contracts to drive real-world blockchain adoption, ensuring transparent transactions and real-time profit sharing among stakeholders. In 2022, Tokenin was nominated as a finalist in the ART domain, recognizing its groundbreaking contributions to the digital economy. He spearheaded the launch of the world's first Coffee NFT platform, empowering local Indonesian coffee farmers by integrating them directly into the supply chain, enabling passive income through real-time profit-sharing and tokenized appreciation from the downstream coffee industry.

With a background in architecture from the University of Indonesia, Stef combines technology, design, and community action planning to create impactful solutions. His passion for social impact led him to volunteer with GTZ and KfW for post-tsunami reconstruction efforts in Aceh, contributing to the region's rebuilding and sustainable development. His work bridges technological innovation and community empowerment, setting new standards for blockchain-driven economic transformation.

Part four

The Ask

Investasi Rp 8.841.000.000 untuk Transformasi Bambu 4.0

Notes:

Bamboo 4.0 NFT Purchase

An innovative approach integrating blockchain technology into bamboo seedling purchases.

Technology Procurement

The use of drones, IoT sensors, and big data development will enhance the efficiency of managing a 490-hectare bamboo farm.

Agricultural Equipment and Operational Vehicles

These investments are crucial for supporting activities in mountainous terrain.

Infrastructure and Facilities

Stable internet access and a representative management office will support project operations.

Human Resource Training

Necessary to ensure effective use of technology and equipment.

Contingency Costs

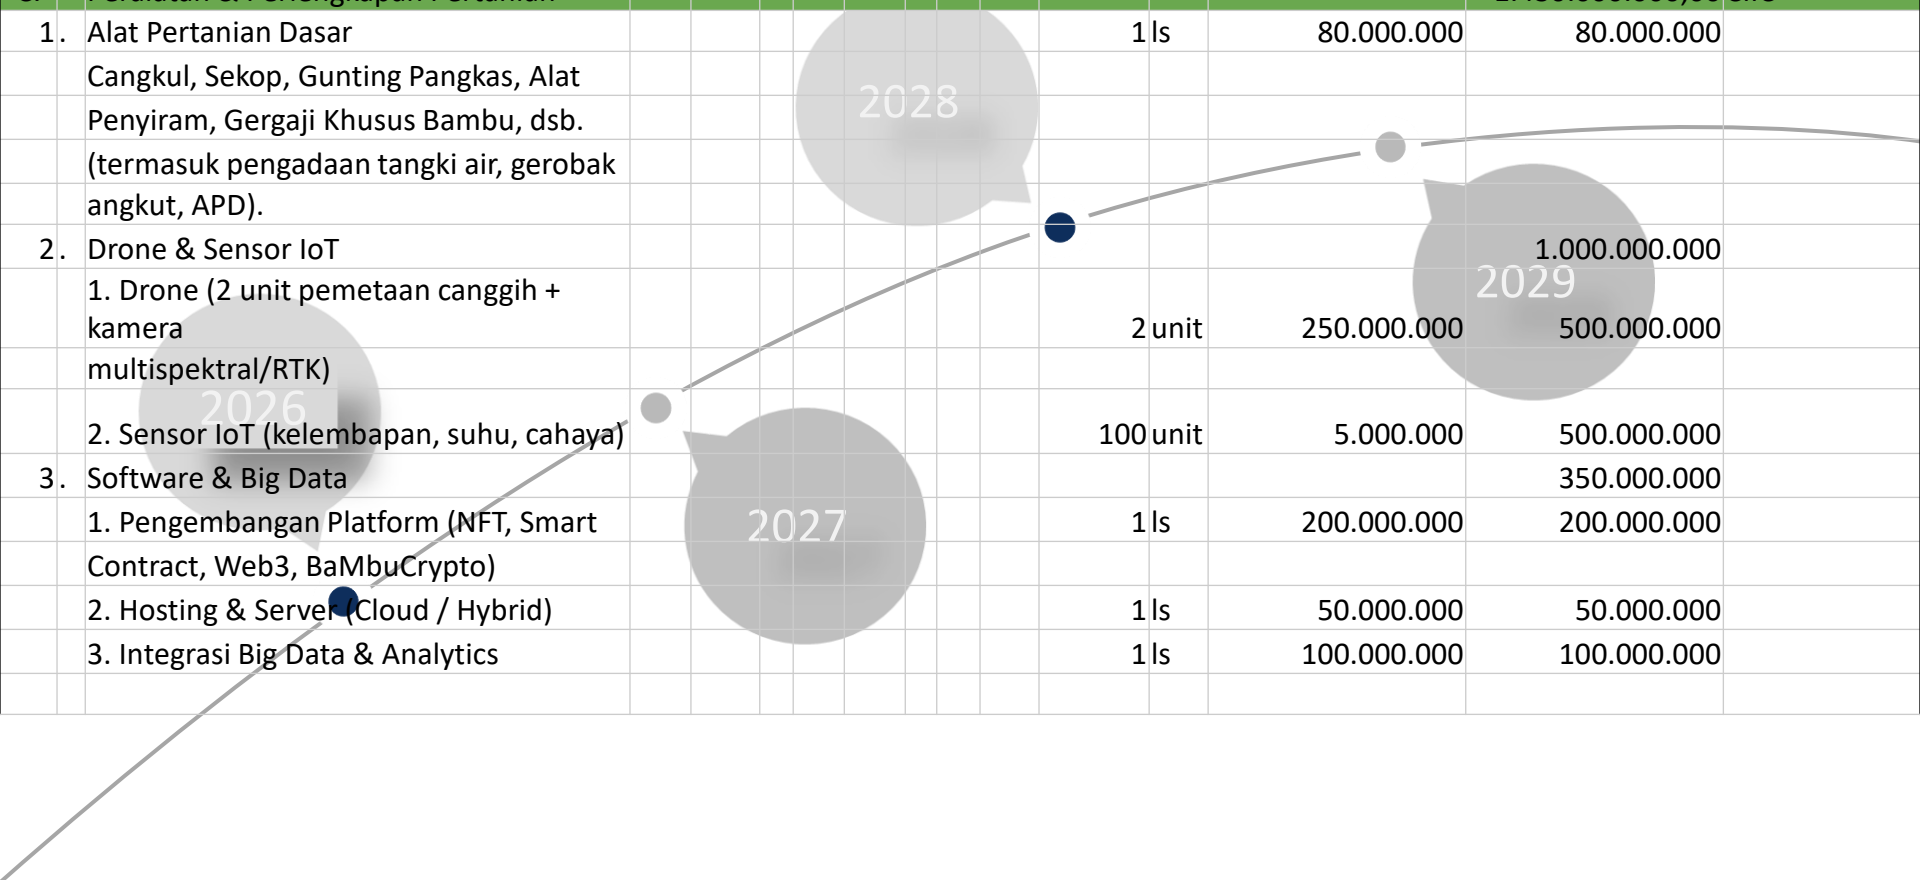

Allocated to anticipate unexpected needs during project implementation.
